**One Line Sky**

In a narrow and long gorge close to the entrance gate of Zhangjiajie Grand Canyon is a path 700 meters long, surrounded by cliffs 300 meters high. It looks like a passageway to Zhangjiajie Grand Canyon. It is a nice place to experience the grandeur of steep cliffs. Looking at the sky from this narrow gorge, visitors will feel like the sky has become small.

### **The Sky Ladder**

The Sky Ladder is a wooden ladder along steep cliffs and ridges. It spans from the top of a mountain down to the bottom. And after a three minutes walk along the Sky Ladder, visitors can have a bird's eye view of One Line Sky.

It looks like a ladder that extends from the sky.

### **The Family Portrait**

It consists of three stone peaks of different heights, which look like a family of three. The tallest one is 'father', the shortest is 'child', and the middle-sized one is 'mother'.

### **The Flying Springs**
